

# ANTI-SPATTER PRODUCTS

## PREVENT SPATTER BUILD-UP!

Tips, nozzles and gas diffuser areas stay clean of spatter with these engineered, guaranteed products. Also effective on parent metals.

### AEROSOLS

#### NOZZLE-KLEEN® HEAVY DUTY

For the highest temperature applications. Non-flammable & paintable. Also excellent stainless steel spatter protection. No methylene chloride, no flouorocarbons.

Part No. WA-7020

#### NOZZLE-KLEEN #2

Highest quality for most applications. Non-flammable and paintable. No methylene chloride, no flouorocarbons.

Part No. WA-7022

### GELS

#### HEAVY DUTY NOZZLE-DIP® GEL

Water based for the highest cooling protection. Cooling gives longer Tip & Nozzle life. Will not migrate to liner area to cause build-up & wire jamming. Non-flashing & biodegradable for safety. Paintable & non-toxic.

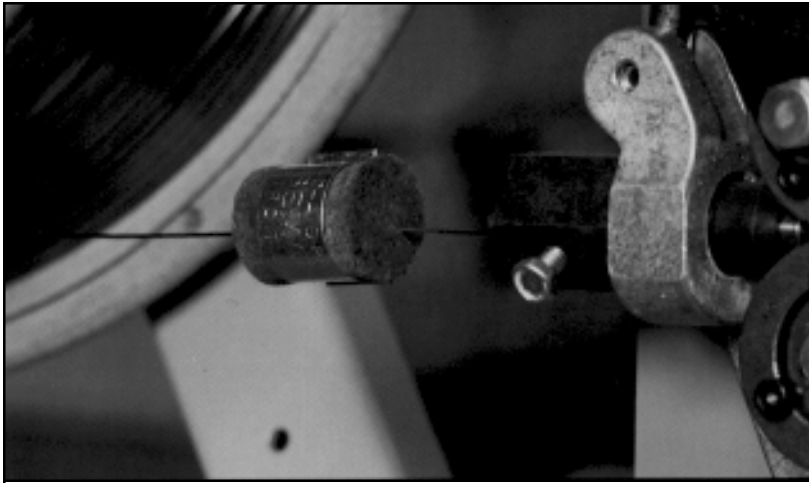

Part No. WA-7094 - quart  
WA-7095 - gallon

#### T.S. GEL

For lower temperature protection. Petroleum based (can flash), paintable, non-toxic.

Part No. WA-7096

## FEED AND CLEAN WIRE!

Rusted or shop-floor contaminated wire, or wires that exhibit poor cast or helix, lose up to 60% of drag. Weld-Aid Lube-Matic products are engineered to clean and lubricate wire, improve feedability, cut spatter and promote longer tip and liner life. Burn-backs and arcing that result from liner and tip jamming virtually disappear.

### LUBE-MATIC WIRE KLEENER & LUBRICANT

Cuts rust and reduces drag.

Part No. WA-7040 - 5 oz.  
WA-7050 - 46 oz.

### LUBE-MATIC LUBE PADS

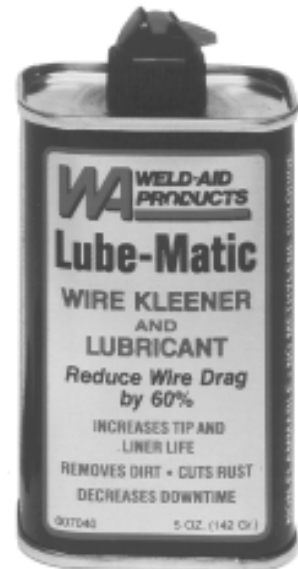

Black pads are pre-treated with lube-matic liquid. Recommended for mild steel and fabricated wires. Re-lubricate with lube-matic liquid when necessary.

Part No. WA-7060

### LUBE-MATIC WIRE KLEENER PADS

Red pads are recommended for all wires including aluminum and stainless. Add lube-matic liquid to help feed mild steel & fabricated wire.

Part No. WA-7061

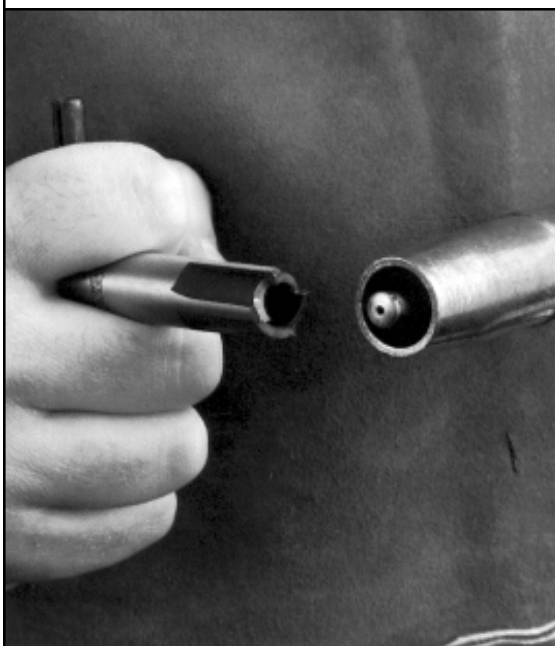

Part No.	Product	Colour	Rating	Density	Tensile	Packed Measure
WA-7060	Lube Pads	Black	SAE F-7	26.2	250 psi	6 Pads; 6 Pressure Clips
WA-7061	Wire Kleener Pads	Red	SAE F-2	34.2	500 psi	6 Pads; 6 Pressure Clips

## CLEAN NOZZLES NOZZLE KLEENER® TOOLS

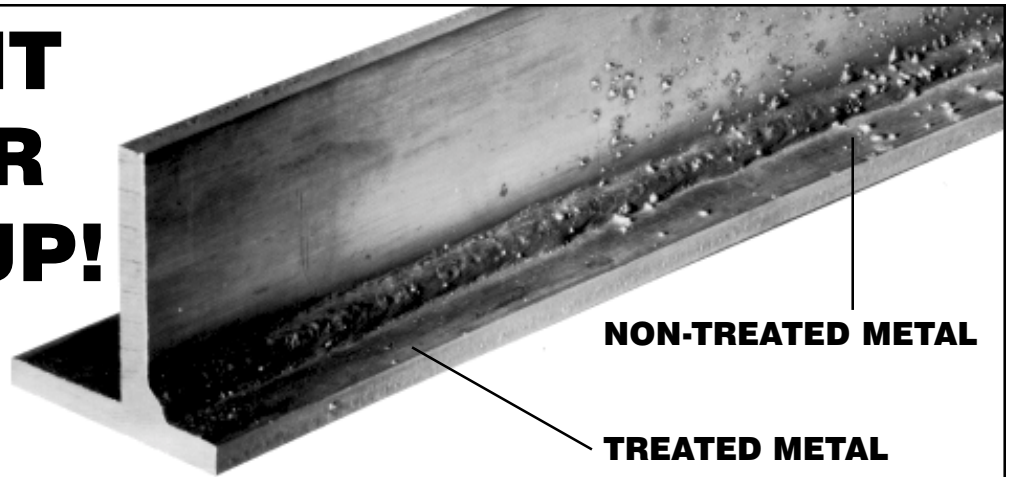

Nozzle Kleener® tools. Helps insure even gas coverage necessary for good weld penetration and appearance with less spatter.

Engineered to remove spatter without scarring from nozzle, tip and gas diffuser areas without disassembly when hot. Ground and hardened to 55 rc, for a lifetime of use.

Part No.	Nozzle Kleener Tool
WA-7001X	NK-1X up to 1/4" Tip - 3/8" Nozzle & Up
WA-7002X	NK-2X up to 5/16" Tip - 1/2" Nozzle & Up
WA-7003X	NK-3X up to 5/16" Tip - 5/8" Nozzle & Up
WA-7004X	NK-4X up to 3/8" Tip - 5/8" Nozzle & Up
WA-7005X	NK-5X up to 13/32" Tip - 3/4" Nozzle & Up

# PREVENT SPATTER BUILD-UP!

Parent metal and fixture applications come out cleaner and better appearing because Weld-Kleen® products are engineered and guaranteed to prevent spatter build-up. Reduce need for grinding and other clean-up procedures; cuts cost. For stainless steel, please use Nozzle-Kleen® Heavy Duty.

## WELD-KLEEN 350

A water based product for most parent metal jobs. Used by all leading manufacturers for improved product quality. Excellent for robot torch Blow down systems. Economical and safe. Biodegradable, non-toxic and paintable. Can be frozen; available in bulk.

- Part No. WA-7089 - Quart (US)
- WA-7090 - Gallon (US)
- WA-7091 - 5 Gallon (US)
- WA-7092 - 55 GALLON (US)

Weld-Aid products have been serving the welding industry for over 30 years. We are committed to meeting the needs of our customers by manufacturing the finest guaranteed-or-your-money-back products on the market today; and we will not settle for anything less. Please let us help you with your spatter problems.

## WELD-KLEEN HEAVY DUTY

A convenient aerosol product. High concentration of product allows for pre-heat and high duty-cycles. Non-flammable, paintable, no methylene chloride, no flouorocarbons.

- Part No. WA-7030

# WELD-KLEEN 350 NON-AEROSOL SPRAY CAN

## Same Great Anti-Spatter Spray

This product is the same great anti-spatter spray you have come to expect from Weld-Aid. Only now it is available in a convenient non-aerosol spray can. Easy to apply and 100% safe for the environment.

Part No. WA-7088

- **Powered by air**
- **Sprays in any position**
- **Controlled spraying**
- **Safe for environment**
- **Water based**

### Reasons to use:

With the increasing concern of chemical solvents and MSDS concerns, Weld-Aid Products has responded to the need of its customers by introducing Weld-Kleen 350 in a safe non-aerosol package. We suggest that when solvent-based products are a problem because of health risks, switch the customer to the new Weld-Kleen 350 non-aerosol.

### Benefits:

For hard to reach applications it sprays in any position, upside down, sideways, you name it, the same consistent spray all the time.

The #1 problem with changing a customer from solvent based aerosol to a waterbased product is that the customer tends to overspray the waterbased product. This overspray leaves too much water on the material to be protected and will cause porosity and leave the customer to believe that the product is inferior to regular aerosol. With the air powered Weld-Kleen 350 this problem is eliminated. Weld-Kleen 350 powered by air, sprays a fine mist to assure proper application.
