Our Position is to Help Welder's Jobs Go Easier, Faster, Safer

Take the Sweat Out of Positioning, Rotating, Supporting & Handling

顿

XT-100 XT-200 500

The Atlas Model XT-100 Welding Positioner is a compact machine suited for smaller weldments up to **100 pounds**, properly balanced, and with the table in the horizontal position. The standard **9" table** is driven by a **DC permanent magnet gear head motor** and precision ground and hardened secondary gearing. The grounding circuit handles up to 200 amps of welding current. Model XT-100 is suitable for stick electrode, MIG or TIG processes and is high frequency protected. Operating speed is set on the front control panel by adjusting the solid state **speed control**. The **variable speed foot switch** initiates table rotation and also allows the operator to feather the speed from slow, up to the maximum speed dialed in at the main speed control. A **forward-off-reverse switch** is also provided along with an easily accessible 2 amp fuse for motor overload protection.

XT-100 Specifications

Table Speeds		
-	Low Speed	Maximum Speed
XT-100 (Standard)	2.5 RPM	11.0 RPM
XT-100-0-2 (Optional)	0.5 RPM	2.8 RPM
XT-100-0-4 "	1.0 RPM	4.7 RPM
XT-100-0-18 "	4.5 RPM	18.5 RPM

Motor DC Permanent magnet motor

Power Requirement 115 V AC 60 cycle @ 1.3 amps. 10'

conductor cord with plug supplied.

Speed Control Solid State electronic feedback

Start/Stop Control Rheostat-type foot switch with 10' cord

Dimensions H = 7.5'', W = 11.5'', Depth = 9''

Net Weight 32 lbs. Shipping Weight 34 lbs.

The Atlas Model XT-200 Welding Positioner handles properly balanced loads up to 200 pounds with the table in the horizontal position. Model XT-200's unique base tilts the table 130° forward and 15° backward. Table angle is adjusted by means of a worm gear and locking hand nut. The standard 10" table is driven by a DC permanent magnet gear head motor and precision ground and hardened secondary gearing. The grounding circuit handles up to 200 amps of welding current and features a back mounted threaded stud for securing your ground lug. Model XT-200 is suitable for stick electrode, MIG or TIG processes and is high frequency protected. Operating speed is set on the front control panel by adjusting the solid state speed control. The variable speed foot switch initiates table rotation and also allows the operator to feather the speed from slow, up to the maximum speed dialed in at the main speed control. A forward-off-reverse switch is also provided along with an easily accessible 2 amp fuse for motor overload protection.

XT-200 Specifications

Table Speeds		
	Low Speed	Maximum Speed
XT-200 (Standard)	2.4 RPM	9.5 RPM
XT-200-0-2 (Optional)	0.4 RPM	2.3 RPM
XT-200-0-4 "	1.0 RPM	5.2 RPM
XT-200-0-18 "	5.0 RPM	21.0 RPM

Motor DC Permanent magnet motor

Power Requirement 115 V AC 60 cycle @ 1.3 amps. 5'3"

conductor cord with plug supplied.

Speed Control Solid State electronic feedback

Start/Stop Control Rheostat-type foot switch with 6' cord Dimensions H = 9.25'', W = 10.625'', Depth = 12.25"

Net Weight 41 lbs. Shipping Weight 45 lbs.

The Atlas Model 500 Welding Positioner handles those tough turning jobs with a capacity of up to 500 pound loads, properly balanced, with the table in the horizontal position. It's 1/4 horse power, DC permanent magnet motor provides plenty of power and torque. Four brass grounding brushes in contact with the table mounting boss route up to 400 amps of welding current to a ½"-13 grounding stud at the rear of the machine. Table speed is set by adjusting the **speed** control dial. A forward-off-reverse switch controls table rotation direction. A full speed override switch allows the operator to advance the table at full speed to a new position for intermittent or stitch welding technique. The brake-on-off control allows the operator to select **Dynamic Braking** which stops table rotation almost instantly when the foot control is released. Model 500's foot switch controls the on-off function of the table rotation. A safety enclosure guards the foot switch. All circuit boards, switches and wiring are mounted in the front panel, which can be guickly removed for diagnostics and repair.

500 Specifications

Table Speed 0-3.0 RPM **Motor** 1/4 HP, DC

Power Requirement 115 V AC 50/60 Hz. 10' cord with plug.

Start/Stop Control Foot switch with 8' cord.

Welding Grnd. Circuit 400 Amps.

Control Panel Functions

Table Rotation Forward-Off-Reverse.

Speed Control Full Range Precision control with IR

compensation.

Full Speed Override On-Off. **Dynamic Braking** On-Off.

Dimensions H = 10'', W = 14.5'', Depth = 15.5''

Net Weight 95 lbs.

^{*}Listed Table Speeds may vary by ± 10%. Please specify speed desired when ordering.

POSITIONERS

Optional Features:

- Dynamic braking.
- Simple tilt plate accessory for angular
- 10" Table, 12" Table.
- 230 volt controls for certain off-shore countries.
- 3-jaw, 5" chuck attaches to table via predrilled holes.

Atlas compact welding positioners, built with the welder in mind, are ideally suited for short-to-long run welding jobs requiring fixturing and postioning.

Their ergonomic, low profile keep welding positioners at a comfortable level for the welder working at a standard height work bench.

Atlas positioners can help boost production on hard to handle jobs requiring circular welding (small spheres and pressure vessels; flange-topipe; pipe-to-pipe; etc.) Heavy duty grounding circuit allows use of stick electrode, MIG or TIG welding processes.

500

Optional Features:

- · Remote control panel.
- · Hollow shaft for gas purge.
- ranges. (up to 8.0 RPM)

Selecting The Right Speed Range

To determine the speed range (in RPM's) needed for a particular job, you need to do the following: calculate the arc travel speed (expressed in inches per minute) at which you will weld, and then determine the circumference of the part to be welded by either direct measurement around the outside, or you may multiply the diameter by 3.14 to calculate circumference. Now, apply this simple formula:

Arc travel speed ÷ part circumference = RPM

Example:

3" diameter part welded at 35" per minute.

3" dia. X 3.14 = 9.42" cirfumerence.

 $35" \text{ speed} \div 9.42" = 3.7 \text{ RPM}$

This simple exercise will help you select the proper Atlas Welding Positioner for your welding needs.

1200 PIPEMATE

The Atlas dual speed Model 1200 Pipemate easily rotates pipe and tube sizes from 1 1/2" to 17" diameter weighing up to 1,200 pounds (with one end of the pipe supported on an appropriate free turning roller, such as our optional Idler Rolls). Two 6" x 2" rubber tired wheels are driven at identical speed and are heat and abrasion resistant. Power is provided by a **DC permanent magnet** motor and hardened secondary gearing. Pipemate features dual speed ranges; 0-35 IPM or 0-70 IPM. Speed range is changed by removing the side cover and reversing the position of the secondary gears. The speed control dial is located on the front panel, along with a forward-off-reverse switch and easily accessible 2 amp fuse for overload protection. A broad spectrum, high frequency filter prevents erratic motor operation when TIG welding. The on-ff foot switch initiates rotation

An optional, non-powered, Atlas IDLER ROLL is an ideal mate for supporting the other end of work pieces. Wheel size, wheel stance and tires are identical to those on the PIPEMATE.

and is protected by a steel safety enclosure.

A specially designed, heavy duty work stand for the PIPEMATE and IDLER ROLL is also available for welding convenience.

1200 PIPEMATE

Optional Features:

- Variable Speed Foot Switch.
- 230 volt controls for certain off-shore countries.

1200 PIPEMATE Specifications

Power Requirement 115 V AC 50/60 Hz.

Dimensions H = 9.25", L = 18", W = 8"

Shipping Weight 56 lbs.

Non-Powered

H = 9.25", L = 16.75", W = 8" **Dimensions**

WARRANTY

Atlas, XT-100, XT-200, 500 and 1200 PIPEMATE are warranted against defects in workmanship or materials under normal use (rental service excluded) for a period of 90 days. Liability is limited to the purchase price paid and liability under the aforesaid warranty is limited to replacing or repairing any parts which are defective in workmanship or materials.
